Project: Password Strength Checker + Generator

1. Problem Statement

Aaj kal log weak passwords use karte hain (123456, password etc.) jisse accounts hack ho jate hain.

Is problem ko solve karne ke liye ek system chahiye jo:

- Password ki strength check kare
- Strong password generate kare

2. Reason for Selection

- Cyber security ka important topic hai
- Real-life problem solve karta hai
- Simple + impactful project

3. Proposed Solution

- Ek application banayenge jo:
- User ka password analyze kare
- Weak / Medium / Strong bataye
- Strong random password generate kare

4. Project Features (IMPORTANT)

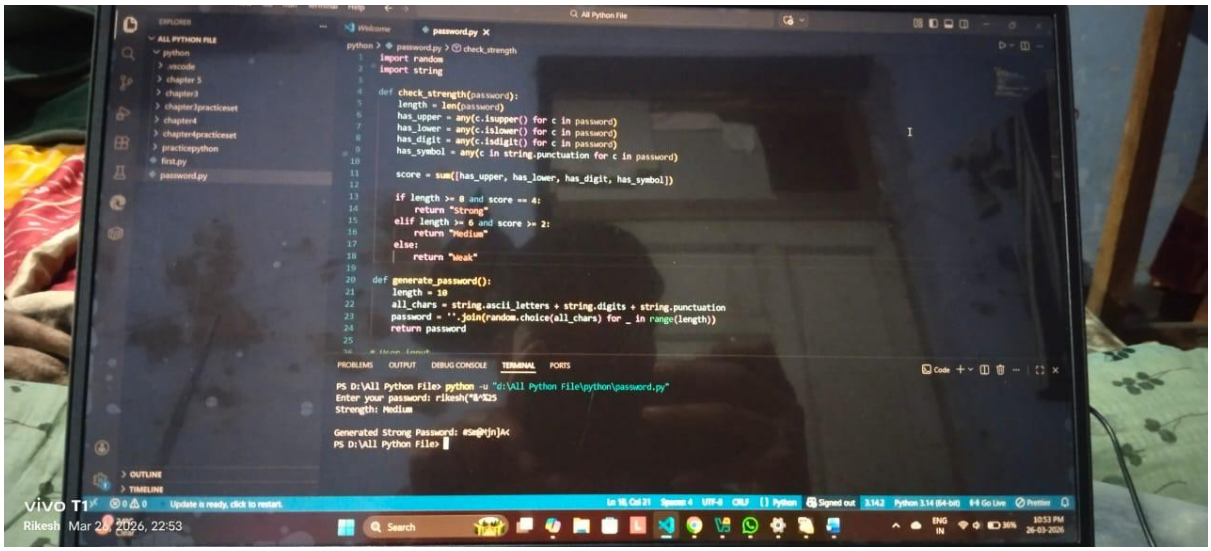
- User password input
- Strength checking (length, symbols, numbers)
- Strong password generator
- Simple user interface
- Instant result display

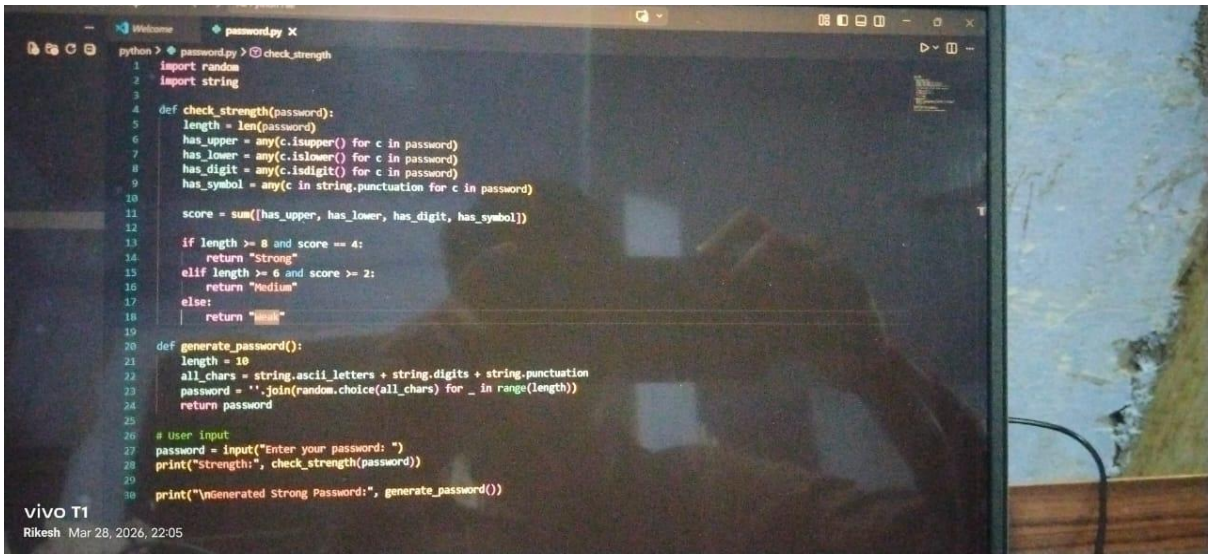
5. Technology Stack

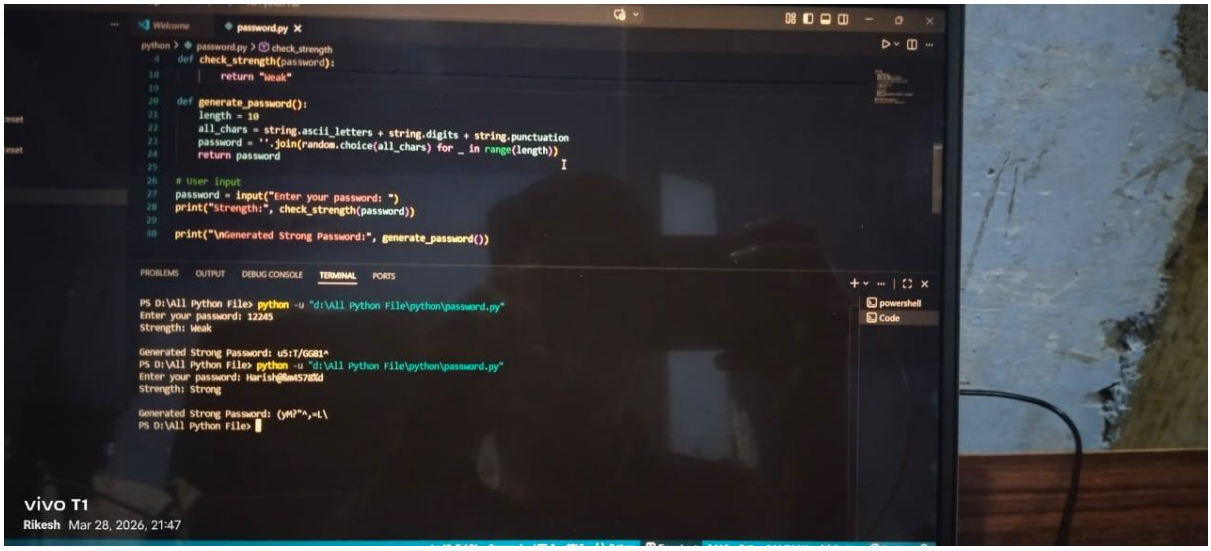
- Python

- Random & String library
- (Optional) Tkinter for GUI

6. Screenshots







8. Future Scope

- **AI-based password checking**
- **Data breach detection**
- **Mobile app version**
- **Browser extension**

9. Conclusion

Ye project users ko secure passwords use karne me help karta hai aur hacking risk kam karta hai.
